INTRODUCTION

A Neighbourhood Plan is being prepared for Wilsden Parish.

This supporting paper details the evidence base used in the designation of Locally Important Buildings and Structures in the draft Neighbourhood Plan. In addition to the nationally recognised buildings and structures, that have been designated there are other buildings and structures that that have been identified as part of the consultation as having an important and positive contribution to the identity and distinctive character of the Parish, and are valued by the local community.

National and local planning policy enables such locally important buildings and structures to have formal recognition in the planning system. Nationally designated heritage assets and structures are listed as an Appendix to the Wilsden Neighbourhood Plan.

Through detailed consultation and analysis, buildings and structures have been identified as especially important to the character of the Parish; the Plan seeks to help their conservation and appreciation through their identification as Wilsden Character Buildings and Sites.

Policy Context

The National Planning Policy Framework (NPPF)¹ recognises the importance of conserving and enhancing the historic environment to an area. Section 16 (paragraphs 184-201) of the NPPF covers all aspects of the historic environment. Paragraph 184 makes the Government's position on heritage very clear, stating "*Heritage assets range from sites and buildings of local historic value to those of*

the highest significance, such as World Heritage Sites which are internationally recognised to be of Outstanding Universal Value. These assets are an irreplaceable resource, and should be conserved in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of existing and future generations". It also introduces the concept of non-designated heritage assets. A non-designated heritage asset is a building, monument, site, place, area or landscape identified as having a degree of significance, but which is not afforded statutory protection through Listed Building, Scheduled Monument etc. status

Paragraph 197 of the NPPF provides the following information on non-designated heritage assets: *"The effect of an application on the significance of a non-designated heritage asset should be taken into account in determining the application. In weighing applications that directly or indirectly affect non-designated heritage assets, a balanced judgement will be required having regard to the scale of any harm or loss and the significance of the heritage asset."*

This is developed in Planning Practice Guidance on the Historic Environment^[2], which states in para 5 *"Where it is relevant, neighbourhood plans need to include enough information about local heritage to guide decisions and put broader strategic heritage policies from the Local Plan into action at a neighbourhood scale."* In para 40 it states *"There are a number of processes through which non-designated heritage assets may be identified, including the local and neighbourhood plan-making processes and conservation area appraisals and reviews. Irrespective of how they are identified, it is important that the decisions to identify them as non-designated heritage assets are based on sound evidence. Plan-making bodies should make clear and up to date information on non-designated heritage assets accessible to the public to provide greater clarity and certainty for developers and decision-makers. This includes information on the criteria used to select non-designated heritage assets and information about the location of existing assets"*.

CBMDC Policy EN3 of the adopted Core Strategy states that *"The Council, through planning and development decisions, will work with partners to proactively preserve, protect and enhance ... the heritage significance and setting of locally identified non-designated heritage assets"*.

Additional guidance is provided in the English Heritage document on Local Heritage Listing². This makes two key statements.

- *Local heritage listing is a means for a community and a local planning authority to identify heritage assets that are valued as distinctive elements of the local historic environment. It provides clarity on the location of assets and what it is about them that is significant, helping to ensure that strategic local planning properly takes account of the desirability of their conservation.*
- *Local heritage listing can be a legitimate response to an actual or perceived threat to a heritage asset, including the threat of demolition, the level of protection afforded is influenced by the manner in which the local heritage list is prepared. The sounder the basis for the addition of an asset to the local heritage list – particularly the use of selection criteria – the greater the weight that can be given to preserving the significance of the asset. The degree of consultation on the list and the inclusion of assets on it also increases that weight.*

A important objective of the process is to ensure that the Wilsden Local Heritage list meets these objectives.

Process for Designation

Whilst the NPPF and the CBMDC Core Strategy establishes the concept of designation of locally important building and structures, local communities preparing a Neighbourhood Plan are given some discretion to determine how to implement this at the local level.

A four-stage approach was adopted by the Neighbourhood Plan Steering Group.

Step 1: Identification of potential sites.

A total of 40 potential sites were identified, 39 buildings and one structure, based upon local knowledge and the outcomes from the community consultation events. These are listed in Table 1.

Step 2: Establishment of assessment criteria

In order to establish an appropriate assessment process we consulted the Historic England publication on Local Heritage Listing³. In conjunction with the detailed advice in this document and with the assistance of Historic England we identified the assessment process used by Oxford City Council to prepare their Oxford Heritage Register as a useful starting point.

The criteria to nominate a heritage asset in the Oxford Heritage Register were used to create an evaluation form appropriate for the local conditions in Wilsden. This enabled a consistent and transparent methodology for identifying Heritage Assets in the Parish. Each potential site was assessed.

Step 3: Assessment against the selected criteria

All the proposed assets were then reviewed for their appropriateness for designation by members of the Neighbourhood Plan Working Group with the support of author of the definitive local history of Wilsden⁴ as an independent adviser, acting in a 'critical friend' role.

These criteria were used to create the individual assessments in this report. This enabled a consistent and transparent methodology for identifying Local Heritage Assets in the Parish.

Step 4: Consultation

The owners and occupiers of all the properties were contacted individually to make them aware of the proposed designation as Locally Important Buildings and Structures and to allow them the opportunity to comment upon the information relating to their property.

Assessment as a Non Designated Heritage Asset

1. WHAT IS IT? Is it one of the following?	Tick
a building or group of buildings	✓
a monument or site (an area of archaeological remains or a structure other than a building)	
a place (e.g. a street, park, garden or natural space)	
a landscape (an area defined by visual features or character, e.g. a city centre, village, suburb or field system)	
2. WHY IS IT INTERESTING? Is it interesting in any of the following ways?	Tick / Rank
Historic interest – a well documented association with a person, event, episode of history, or local industry	✓
Archaeological interest – firm evidence of potential to reveal more about the human past through further study	
Architectural interest – an example of an architectural style, a building of particular use, a technique of building, or use of materials	
Artistic interest – It includes artistic endeavour to communicate meaning or use of design (including landscape design) to enhance appearance	
What is it about the asset that provides this interest? In 1869 part of the congregation of St Matthews had a disagreement with their 'high church' vicar Joseph Ellis about the form of worship and left to set up St James' Free Church in this building at Wellington Street. Its construction was paid for by its new congregation. The church was used by them for 16 years until Joseph Ellis moved on and the two congregations re-united. It was then sold and became the Conservative Club.	
3. WHY IS IT LOCALLY VALUED? Is the interest of the asset valued locally for any of the following reasons?	Tick / Rank
Association: It connects us to people and events that shaped the identity or character of the area	✓
Illustration: It illustrates an aspect of the area's past that makes an important contribution to its identity or character	✓
Evidence: It is an important resource for understanding and learning about the area's history	✓
Aesthetics: It makes an important contribution to the positive look of the area either by design or fortuitously	
Communal: It is important to the identity, cohesion, spiritual life or memory of all or part of the community	✓
How is the asset locally valued as heritage? Chapel-like appearance is unusual and a valued part of the Wellington Street and Peel Street streetscape.	

4. WHAT MAKES ITS LOCAL SIGNIFICANCE SPECIAL? Do any of the following features make the heritage significance of the asset stand out above the surrounding environment?	Tick
Age ... Is it particularly old, or of a date that is significant to the local area?	1869
Rarity ... Is it unusual in the area or a rare survival of something that was once common?	
Integrity ... Is it largely complete or in a near to original condition?	
Group value ... Is it part of a group that have a close historic, aesthetic or communal association?	✓
Wilsden's identity ... Is it important to the identity or character of the Parish or a particular part of it?	✓
Other ... Is there another way you think it has special local value?	
How does this contribute to its value? It was a church for 16 years. The building is plain but still looks chapel-like.

Aesthetics: It makes an important contribution to the positive look of the area either by design or fortuitously	✓
Communal: It is important to the identity, cohesion, spiritual life or memory of all or part of the community	✓
How is the asset locally valued as heritage? There is a local story connected to it that no windows were allowed in the south side of it due to a falling out between the mill master who owned the cottages behind the stables and the farmer, who owned the stables and fields to the north.	

4. WHAT MAKES ITS LOCAL SIGNIFICANCE SPECIAL? Do any of the following features make the heritage significance of the asset stand out above the surrounding environment?	Tick
Age ... Is it particularly old, or of a date that is significant to the local area?	Probably Georgian
Rarity ... Is it unusual in the area or a rare survival of something that was once common?	✓
Integrity ... Is it largely complete or in a near to original condition?	✓
Group value ... Is it part of a group that have a close historic, aesthetic or communal association?	
Wilsden's identity ... Is it important to the identity or character of the Parish or a particular part of it?	✓
Other ... Is there another way you think it has special local value?	
How does this contribute to its value? It is a tangible link with the village's history in the days of horse and cart, set in the last pocket of open agricultural land in a central location. Bradford's Conservation Area Assessment states: <i>"Almost by chance it would seem, two agricultural spaces have survived [now only this one] within Wilsden despite its considerable expansion and infill and the closing down of working farms along Main Street in the second half of the last century. The largest of these areas directly fronts Main Street next-door to St Matthew's Church. To the east of the stables and barn, this strip of land extends behind the church and as far as the bank of Wilsden Beck. This unusual survival, which is still used for grazing, not only retains a small courtyard with farm buildings, but also its stone walls and, save the church, its original shape. This space and its use are a valuable connection between the village and the surrounding countryside".</i>

Architectural interest – an example of an architectural style, a building of particular use, a technique of building, or use of materials	
Artistic interest – It includes artistic endeavour to communicate meaning or use of design (including landscape design) to enhance appearance	
What is it about the asset that provides this interest? Originally four cottages the two which now comprise Hallas Grange were the residence and counting house for Hallas Mill owner Robinson Brear. In 1878 his son, Solomon Brear, converted the whole range into one large house called Hallas Grange until 1918 when it was divided into the two dwellings it is today – Hallas Grange on left and Hallas Mount on right. Latter was sold to National Institute for the Blind in 1920 to house blinded ex-serviceman (WWI) Sam Wright.	
3. WHY IS IT LOCALLY VALUED? Is the interest of the asset valued locally for any of the following reasons?	Tick / Rank
Association: It connects us to people and events that shaped the identity or character of the area	✓

1 – 7 Greenley Hill

1. WHAT IS IT? Is it one of the following?	Tick
a building or group of buildings	✓
a monument or site (an area of archaeological remains or a structure other than a building)	
a place (e.g. a street, park, garden or natural space)	
a landscape (an area defined by visual features or character, e.g. a city centre, village, suburb or field system)	
2. WHY IS IT INTERESTING? Is it interesting in any of the following ways?	Tick / Rank
Historic interest – a well documented association with a person, event, episode of history, or local industry	✓
Archaeological interest – firm evidence of potential to reveal more about the human past through further study	
Architectural interest – an example of an architectural style, a building of particular use, a technique of building, or use of materials	
Artistic interest – It includes artistic endeavour to communicate meaning or use of design (including landscape design) to enhance appearance	
What is it about the asset that provides this interest? Short terrace with interesting architectural details and cobbled roadway to front leading to field behind. An example now unusual in Wilsden (with the exception of Wilsden Hill) where the old cottages retain their rural setting and permeability into the agricultural land.	
3. WHY IS IT LOCALLY VALUED? Is the interest of the asset valued locally for any of the following reasons?	Tick / Rank
Association: It connects us to people and events that shaped the identity or character of the area	✓
Illustration: It illustrates an aspect of the area's past that makes an important contribution to its identity or character	✓
Evidence: It is an important resource for understanding and learning about the area's history	
Aesthetics: It makes an important contribution to the positive look of the area either by design or fortuitously	✓
Communal: It is important to the identity, cohesion, spiritual life or memory of all or part of the community	✓
How is the asset locally valued as heritage? It retains some of the linkage to the early years of the Industrial Revolution when Wilsden changed from a group of agricultural hamlets to a mill village.	

4. WHAT MAKES ITS LOCAL SIGNIFICANCE SPECIAL? Do any of the following features make the heritage significance of the asset stand out above the surrounding environment?	Tick
Age ... Is it particularly old, or of a date that is significant to the local area?	1865
Rarity ... Is it unusual in the area or a rare survival of something that was once common?	
Integrity ... Is it largely complete or in a near to original condition?	
Group value ... Is it part of a group that have a close historic, aesthetic or communal association?	✓
Wilsden's identity ... Is it important to the identity or character of the Parish or a particular part of it?	✓
Other ... Is there another way you think it has special local value?	
How does this contribute to its value? The upper cottage on Laneside retains an excellent and well maintained example of an iron field gate and garden gate made by the Ackroyd family in the smithies in both Harecroft and Wilsden.	

Lane End House, Lane Side, Wilsden BD15 0ND

Lane End House

1. WHAT IS IT? Is it one of the following?	Tick
a building or group of buildings	✓
a monument or site (an area of archaeological remains or a structure other than a building)	
a place (e.g. a street, park, garden or natural space)	
a landscape (an area defined by visual features or character, e.g. a city centre, village, suburb or field system)	
2. WHY IS IT INTERESTING? Is it interesting in any of the following ways?	Tick / Rank
Historic interest – a well documented association with a person, event, episode of history, or local industry	✓
Archaeological interest – firm evidence of potential to reveal more about the human past through further study	✓
Architectural interest – an example of an architectural style, a building of particular use, a technique of building, or use of materials	
Artistic interest – It includes artistic endeavour to communicate meaning or use of design (including landscape design) to enhance appearance	✓
What is it about the asset that provides this interest? Originally built as a Sunday School to the former St Matthews Church (demolished 1962) which was immediately opposite.	
3. WHY IS IT LOCALLY VALUED? Is the interest of the asset valued locally for any of the following reasons?	Tick / Rank
Association: It connects us to people and events that shaped the identity or character of the area	✓
Illustration: It illustrates an aspect of the area's past that makes an important contribution to its identity or character	✓
Evidence: It is an important resource for understanding and learning about the area's history	✓
Aesthetics: It makes an important contribution to the positive look of the area either by design or fortuitously	✓
Communal: It is important to the identity, cohesion, spiritual life or memory of all or part of the community	✓
How is the asset locally valued as heritage? This building, the closed churchyard and the former vicarage at 60 Laneside represent the remaining links to the former St Matthews parish church that was demolished in 1962.	

4. WHAT MAKES ITS LOCAL SIGNIFICANCE SPECIAL? Do any of the following features make the heritage significance of the asset stand out above the surrounding environment?	Tick
Age ... Is it particularly old, or of a date that is significant to the local area?	1826-1835, enlarged in 1892 and 1928
Rarity ... Is it unusual in the area or a rare survival of something that was once common?	
Integrity ... Is it largely complete or in a near to original condition?	
Group value ... Is it part of a group that have a close historic, aesthetic or communal association?	✓
Wilsden's identity ... Is it important to the identity or character of the Parish or a particular part of it?	✓
Other ... Is there another way you think it has special local value?	
How does this contribute to its value? Although there is no precise date when the Sunday School was built the land was purchased shortly after the church opened in 1826. In addition to being a Sunday School the OS map of 1852 describes this building as a National School. The National schools were founded in 19th century England and Wales by the National Society for Promoting Religious Education. These schools provided elementary education, in accordance with the teaching of the Church of England, to the children of the poor. Although there is no evidence that it was ever used as National School with the building at 87-89 Main Street (see p106) being the main establishment in Wilsden the Church of England link indicates that it was possibly used as more than only as a Sunday School. When the St Matthews building became unsafe in 1957 the congregation worshipped in the Sunday School until the building was sold in 1962 when the church was demolished. It is now a private residence.

How does this contribute to its value? The enclosure of the land here took place after 1670 and there is a record of the farm being bought in 1726. In 1801 the then owner gave his sons land to develop a cotton mill but this was bankrupt by 1805. In 1823 the land became part of the Horton Old Hall estates until 1955. Over the period from 1823 no changes took place to the farm and since 1955 subsequent changes at the farm have been to separate buildings. This link to Francis Sharp Bridges and the Bardsley Powell estates is an association with one of Bradford's most prominent families.

Artistic interest – It includes artistic endeavour to communicate meaning or use of design (including landscape design) to enhance appearance	
What is it about the asset that provides this interest? The location of these two Built properties, known as “The Nook”, is close to the hamlet of Norr. The Nook has existed as an agricultural/farm since the 1700s. It appears on many historic maps (and is very clear on the 1830 map which also shows Ling bob, Shay Gate and The Norr). In 1830 it formed part of a 30 acre farm - Nook Farm Nook House with its multi-paned windows shows a regency style of architecture, unusual in the village. Nook Barn retains the characteristic double height large arched entrance.	
3. WHY IS IT LOCALLY VALUED? Is the interest of the asset valued locally for any of the following reasons?	Tick / Rank

How is the asset locally valued as heritage? William Pickles owned the land and lived at “The Nook” in 1832, and is on the electoral roll, in a property that is on the site of the present Nook Barn. A new Nook Farm House was built by him in 1840, next to the old property. At the time, Crack Lane ran through the centre of Nook Farmyard, between the old Nook Farm House and a small barn/store. As part of the rebuilding, Crack Lane was re-routed around the small barn to the road course we can see today. Nook Barn was added in the position of the former Nook Farm House, next to the new house in 1844. The smaller barn was then retained as a stable.

How does this contribute to its value? Nook Farm was a dairy farm for much of its history, but it was also a major horse breeding farm that supplied horses to the British Army in WWII. It continued to supply horses for the railway companies until 1962 – linking it to Wilsden Railway Station and the establishment of Wilsden as an equestrian centre. Nook Barn fell into disrepair in the late 20th century and was sensitively converted into two residential dwellings in 2002 with the structure of the building being retained to mirror the façade and footprint of the original barn. It retains the dated keystone showing “WP 1844”.
